

Wael Bilal

AI Agent & Mobile Application Developer

 waelbilal20032003@gmail.com |  +963 934 875 267 |  Damascus, Syria

Professional Summary

AI Engineer with 2+ years of experience developing intelligent mobile applications and AI-powered solutions. Specialized in building conversational AI systems, speech-to-text applications, and cross-platform mobile apps using Flutter. Passionate about leveraging AI to solve real-world problems and enhance user experiences.

Education

- 2023–2025 — Diploma in Artificial Intelligence Engineering — DTC / UNRWA
- 2022–2023 — High School Diploma (Baccalaureate) — GPA 1800
- 2019–2020 — Diploma in Office Machine and Computer Maintenance — DTC / UNRWA

Work Experience

2024–Present | Freelance AI & Mobile Developer

- Developed AI-powered mobile applications for clients
- Built conversational chatbots and speech-to-text solutions
- Delivered 13+ projects across mobile, web, and AI domains

Skills

Programming Languages

- Dart / Flutter (Advanced)
- Python (Advanced)
- SQL
- PHP / Laravel
- JavaScript
- C#

Artificial Intelligence & Machine Learning

- Rasa NLP Chatbot Development
- Whisper STT (Speech-to-Text)
- A* & Genetic Algorithms
- OpenCV
- Gemini AI Integration

Mobile Development

- Flutter / Dart
- Android Development
- Firebase Push Notifications
- SharedPreferences
- Local Data Storage

Database Management

- MySQL
- SQLite
- JSON File Management

VPS Hosting & Server Management:

- Deploying applications on Linux VPS
- SSH server administration
- Web server configuration (nginx/apache)

Tools & Platforms

- Git / GitHub
- Unity Hub (3D Game Development)
- Android Studio
- Visual Studio
- Postman API Testing
- Ngrok
- Draw.io
- WinSCP
- Hostinger
- XAMPP & Laragon
- Render

Languages

- Arabic (Native)
- English (Fluent)

TECHNICAL PROJECTS

Sywabot - AI Travel Chatbot

Technology: Flutter, Dart, Rasa NLP, Python Backend, Render Server

Intelligent conversational chatbot for travel planning that suggests personalized travel itineraries.

Key Features: Fast response time with intelligent answer shortening | NLP-powered conversation for travel recommendations | Seamless database integration | Cross-platform Android deployment

Smart Lecturer - Audio to Text Converter

Technology: Flutter, Dart, Whisper Model, Python Backend, Gemini AI

Application that converts audio lectures to text in real-time with automatic summarization and PDF export.

Key Features: Real-time audio transcription with noise cancellation | Smart microphone with silence detection | Gemini AI-powered lecture summarization | Instant PDF export | Accessibility support for deaf users

Minex - Social Commerce Platform

Technology: Flutter, Dart, Laravel, PHP Backend, Firebase, Hostinger

Facebook-style e-commerce application for Syrian market.

Key Features: Advanced admin panel with full control | Posts, comments, messages, and notifications system | Theme customization and visitor mode | Fast performance with Firebase push notifications | Advanced search functionality

Workers Wages App

Technology: Flutter, Dart, SharedPreferences

Simple application for managing multi-currency worker wages with attendance tracking.

Key Features: Multi-currency wage calculation | One-tap attendance tracking | Index feature for quick search | Lifetime data persistence without internet

Al-Hal Market Accountant

Technology: Flutter, Dart, SharedPreferences, JSON, PDF

Comprehensive accounting application for wholesale market.

Key Features: Compact mobile design displaying all elements on single screen | Lifetime storage without internet | Index feature and PDF export

Shop Debts Manager

Technology: Flutter, Dart, SharedPreferences, JSON, PDF

Supermarket debt tracking application replacing traditional ledgers.

Key Features: Budget calculation and analysis | PDF invoice generation in 2 seconds | Backup and data transfer capability | Index feature for quick search

Slide Puzzle AI Solver

Technology: Python, heapq, copy, typing

Intelligent algorithm that solves all difficulty levels of the sliding puzzle game.

Key Features: Solves all puzzle configurations using A* search | Elegant UI design mirroring the game | Optimized heap-based search algorithm

3D Tank Battle Game

Technology: Unity Hub, C#, NavMesh, 3D

3D tank game featuring AI-controlled robots that evade and attack the player.

Key Features: Robots actively escape from tank | Zoom, bombing effects, and robot flight animations | Realistic terrain mimicking tank battlefields

Naruto Balls - Multi-Ability Game

Technology: Unity Hub, C#, NavMesh, 3D

3D game featuring 5 balls with unique abilities.

Key Features: Robots attack balls aggressively | Each ball has distinct ability (shrink/expand/speed/jump/shoot) | Individual or group control of all balls

Crazy Billiard - AI Pool Game

Technology: Unity Hub, C#, NavMesh, 3D

3D billiard game with AI-powered black ball.

Key Features: Unique camera angle control | AI black ball with unpredictable aggressive behavior | Scoring system with ball differentiation

Turkish Box - Box Cost Calculator

Technology: HTML, CSS, JavaScript, GitHub

Website for calculating box dimension costs.

Key Features: Responsive design for all devices | Instant and accurate calculations

Bayah School - Educational Platform

Technology: HTML, CSS, JavaScript, Laravel, PHP, VPS Hosting

Educational website for UAE school with quiz system and points tracking.

Key Features: Quiz system with student point tracking | Likes, comments, and confidential file upload | Video, podcast, and PDF upload | Accurate points calculation system | Leaderboard ranking students by activity

Original Accounting App

Technology: Flutter, Dart, SharedPreferences, JSON, PDF

Desktop accounting application for goods trading.

Key Features: Permanent data storage for multiple devices | PDF export for invoices and details | Backup system | Full mouse-free operation for fast typing

Interests

- Competitive Chess Player
- Fiction Novel Writing

KEY ACHIEVEMENTS

- Designed AI-powered travel chatbot (Sywabot) with smooth performance and NLP integration
- Developed Smart Lecturer app for audio-to-text conversion with Gemini AI summarization
- Built social media application (Minex) with Facebook-like features for Syrian market
- Created AI slide puzzle solver using A* algorithm with heap-based optimization
- Developed multiple 3D Unity games (Tank, Billiard, Naruto Balls) with AI mechanics
- Received A+ for innovative problem-solving in AI algorithms course
- Presented projects at DTC Damascus and TechnoSpark exhibitions
- Completed intensive AI Engineering diploma with practical project experience

CERTIFICATIONS & TRAINING

- AI Engineering Diploma — DTC / UNRWA Damascus (2025)
- Computer & Office Machine Maintenance Diploma — DTC / UNRWA (2020)
- AI Model Building Workshop — EMBS [2 months] (2025)

EXHIBITIONS & EVENTS

- DTC Damascus Institute Exhibition — Project Presenter — Damascus, Syria (2025)
- TechnoSpark Exhibition — Project Presenter — Damascus, Syria (2025)
